

Adjustable Height Wine Rack Kits Achieving a Custom Fit

How To Custom Fit

What size molding package should you choose to achieve a custom fit?

Below is a chart that shows the heights you can achieve with the various molding options. Based on the ceiling height you have you can choose the appropriate molding option. There are two base molding height options, and there are minimum and maximum's listed per these two height options below. The heights have a minimum and maximum because you can install the moldings in various heights on the front face of the rack, as well as with the double stacked moldings you can also adjust the height of the molding when installing it. Please note : all heights listed for the 5 1/4" base can only be achieved when purchasing the platforms available for each wine rack kit.

	1 7/16" Base		5 1/4" Base	
	Min. Height	Max. Height	Min. Height	Max. Height
JD Crown	95 1/16	95 7/8	98 7/8	99 11/16
OG Crown	95 11/16	96 1/4	99 1/2	100 1/16
Beaded Crown	96 7/8	97 5/8	100 11/16	101 7/16
Beaded with JD Crown	96 7/8	98 7/16	100 11/16	102 1/4
Grande Crown	97 1/4	97 15/16	101 1/16	101 3/4
Beaded with Grande Crown	98 11/16	100 1/2	102 1/2	104 5/16

Component Options

The following component options are available for this series:

Base & Crown Molding Packages – There are 24 options available, with varying heights and profiles. Each package is 48" in length.

Stackable Beam Support – If you choose to stack your wine racks, this piece is mandatory as it stabilizes the racks into one combined structure. This piece comes standard with and is included in every base & crown molding package, but is also available by itself for every wine rack, if base and crown is not desired.

Center Trim – 3 1/4" tall double sided profile molding has been designed to cover the seam created when you stack your wine racks. Each package is 48" in length.

Platform – Utilize a platform specifically designed and engineered to elevate each wine rack kit, to achieve maximum height. You must also purchase this special platform in order to use the 5 1/4" base molding package. This platform can support one wine rack, or two stacked. The platform is 3 13/16" High, and will allow you to maximize the rack height in any room. Please note : If you order the platform stained, only the top will be stained, as majority of customers will be attaching base molding to the front of the platform. If you would like the front or the side of the platform to be stained, you should order a half pint of stain from us to touch it up. Please call us directly to order stain.

Wine Racks – There are many different styles of wine racks available in the Vintner Series Collection. The standard height of each wine rack in the Vintner Series is 47 3/16". The combined height of two wine racks and the stackable beam support is 95 1/16" when it is not on a platform and does not have any moldings attached to it. The overall height of two wine racks stacked, with the beam support, and sitting on a platform is 98 7/8".

Filler Paneling Material – Matching paneling material is available to fill in any gaps that you might have. Each Filler Material package comes standard with 2 – pieces that are 48" tall & 6" wide. This paneling material is meant to be cut to fit on site.

What's the next step? -- Give us a call and we'll help you design your wine cellar, identify all the components and provide a quote. We can be reached at 877.888.9137 during normal business hours, or email us anytime at info@swawine.com.
